Biotrisse Classic is a classic of the Biotrisse line. It consists of 3 preparations with various viscoelastic properties for surface, intradermal, and subcutaneous use, intended for both the most subtle stages of contour correction and for tissue volumizing. Biotrisse Classic includes fillers with cross-linked hyaluronic acid of the highest level of purity, whose plasticity and convenience of use are among the best available.

A classic preparation with cross-linked hyaluronic acid for natural volumizing and correction of mid-level and deep wrinkles.
